

# Craven Street Improvement Project: Multimodal Roadway Improvement (Craven Street Waterline Upgrade)

Posted 09/23/2014  
Last Revised 10/30/2014

## Timeline

### 2015 MARCH

Estimated project completion

### 2014 NOVEMBER

Realignment of the intersection of  
Craven Street and Hazel Mill Road

### 2014 SEPTEMBER TO BEGINNING OF NOVEMBER

Craven Street will be closed to  
complete roadway improvements

### 2014 APRIL 21

Construction begins on the  
Waterline upgrade and  
multimodal improvement project

## What's happening now?

Work on the installation of the stormwater culvert is progressing but has been delayed because of rain and installation of additional foundation. Due to these delays, Craven Street will be closed to through traffic from Georgia Avenue to Waynesville Avenue for an additional 3 weeks through approximately November 5, 2014.

In addition, current work on the project will include installation of a new water line and the placement of fill material for the new intersection of Hazel Mill Road, Emma Road and Craven Street. This intersection work will be finalized when the culvert installation is completed and Craven Street is opened up for through traffic.

## Background

The Craven Street Multimodal Roadway Improvement project is a part of the larger Craven Street Improvement project located in the area surrounding the New Belgium Brewery construction site.

This portion of the project involves Haywood Road to Emma Road, a road section that is currently inadequate for New Belgium Brewing's operations. The road will be widened to the east of the current layout in order to accommodate trucks and to include bike lanes, necessary stormwater infrastructure, and an ADA compliant sidewalk on Craven Street from Haywood Road to the Craven Street Bridge. A realignment of the intersection of Craven Street and Hazel Mill Road will significantly improve transportation navigation issues and increase public safety. A transit shelter will be provided at the intersection of Haywood Road and Craven Street.
